The Bay Academy Guidance Department understands that it may seem difficult to transition from learning in our school to remote learning at home. Even though we are not meeting everyday in the same building, your counselors are here for you via Jupiter message, Email and Google Classroom. We've put together some resources for you to start you off on this totally new experience! Remember, new isn't bad, its just different!
Recent days have taught us that technology is truly an amazing thing! Our schoolwork, our communication with our friends and family and our entertainment all comes to us through technology. So why not travel... virtually of course... to the greatest sites, places and institutions of the world?

This week, your school counselors will be helping you take virtual field trips, but before we do, why not do some Google searches on your own?

The most amazing museums, plays, concerts, sports arenas, zoos, aquariums, and even planets are at your finger tips.

So take a break from social media for a bit, and use the phone in your hands, or the computer in front of you, to see the world like you've never seen it before!

The best part?... No permission slips needed! We can't wait to hear about your adventures!
